

Short title	e.g. GMALL 07/2003
Full study title	e.g. Multicenter Study To Optimize Treatment of Acute Lymphoblastic Leukemia in Adults (> 15 years) - Treatment Optimization by Evaluation of Minimal Residual Disease - (GMALL 07/2003)
Study code / number	All studies should be indexed by an “identification code” like: disease_country_number_.... this code is given by ELIC
Name of the study group	e.g. GMALL, GIMEMA, HOVON, NILG – if applicable + add form
Study type	e.g. multicenter, phase II or III, controlled, randomized ...
Disease	e.g. CML, AML, ALL...
Stage	e.g. de novo, relapsed, refractory
Age	age limits according to entry criteria
Aims	e.g.: end points
Principal Investigator	with name, telephone, fax or e-mail address
Contact person(s) Study Center	e.g. data manager, study coordinator
Inclusion Criteria	bullet point style
Exclusion Criteria	bullet point style
Study Design / Treatment overview	<u>Short</u> description of study design e.g. risk stratification, randomisation and therapy (without dosage),
Overview	e.g. Flow-Sheet, graphics
Central diagnostics	Laboratories, with names, telephone, fax or e-mail address – for each type of diagnostic
Biometrics	Institution, with names, telephone, fax or e-mail address
Sponsors	e.g. Pharmaceutical Industry, government aid – if applicable
Seal of approval	e.g. German Cancer Foundation

A short protocol should not contain details like the full study protocol and exceed not more than 2-3 pages
