

## **Workshop on Information Technology**

*organized by*

*WP 1: Network Management Center NMC*

*WP 2: European Leukemia Information Center ELIC*

*WP 3: Central Information and Communication Services CICS*

**09.00 - 13.00 h**

### **PART I**

#### **How to submit content to the ELN-Website**

Konferenzzimmer II, DKFZ, Im Neuenheimer Feld 280

**11.00 - 11.30 h**

#### **Coffee break**

**09.00 - 13.00 h**

#### **ELN-Website - How to submit content**

*F. Hoffmann (Berlin/Germany)*

*A. Hellenbrecht (Frankfurt/Germany)*

- Introduction to the Content-Management-System CMS (Software for the ELN-Website)
- Access and structure
- Presentation and practical training (submitting text, files, images)

**13.00 - 14.00 h**

#### **Lunch break**

**14.00 - 17.45 h**

### **PART II**

#### **IT for clinical trial support and registries**

Auditorium R001, ZMBH, Im Neuenheimer Feld 282

**14.00 - 14.30 h**

*T. Müller (Munich/Germany)*

#### **Introduction in web-based Randomization**

**14.30 - 15.15 h**

*A. Fischer (Munich/Germany)*

#### **Electronic Data Capture - MACRO**

**15.15 - 16.00 h**

*M.C. Béné (Vandoeuvre les Nancy/France)*

#### **Internet-based integrated clinical and biological databases for therapeutic trials**

**16.00 - 16.30 h**

#### **Coffee break**

**16.30 - 17.00 h**

*T. Müller (Munich/Germany)*

#### **Report from TMF-Meeting on personal data issues in European medical research projects**

**17.00 - 17.45 h**

*R. Brand (Leiden/The Netherlands)*

#### **Designing and implementing (inter)national registries: the Leiden experience with the ProMISe interface**

## **PART I**

The ELN-Website was built up with a so called Content-Management-System (CMS). A CMS is a computer software system for organising and facilitating collaborative creation of documents and other content in the web. With a CMS, the act of „writing content“ is separated from the act of „compiling it“ into any particular form.

The CMS-Training addresses to the web-editors of the ELN as well as to all other interested network members of the European LeukemiaNet and Kompetenznetz „Akute und chronische Leukämien“.

**You will learn, how to add content to the website, how to present images, files and other information.**

There is no previous IT-knowledge required and everybody is invited to participate. Private laptops for the practical part are highly welcome, wireless LAN is provided. The number of participants is limited to 15 persons, to make sure that the training is most effective.  
(Training will be held in english.)
